

Certificate of Participation

GESIS Workshops

Using Smartphone Sensors, Apps, and Wearables in Social Science Research

This is to certify that

Adolfo Fuentes

participated in the above-named course, part of the “GESIS Workshops” offering, which took place in online. The GESIS workshops are one- to three-day courses in a broad range of social science research methods, from qualitative interviews, questionnaire design for surveys, sampling, and introductions to specific survey programs to statistical software and data analysis.

The course was held over 2 days, consisting of 12 hours of online instruction and practical exercises.

Lecturers: Bella Struminskaya (Utrecht University)
Florian Keusch (University of Mannheim)

Date: 17th-18th April 2023

Course content:

- Research and study design (cont'd), practical implementations, and operational considerations
- Practical implementations and operational considerations (cont'd)
- Errors when collecting, processing, and interpreting sensor data
- Practical examples of sensor data collection and integrating it with survey data
- Individual counseling
